Chetan Ankola

Principal Product Manager · Mobile Mail and Productivity

San Francisco Bay Area · cankolabuilds.com · linkedin.com/in/chetanankola · X @chetanankola · GitHub private (on request)

20M daily actives on Yahoo Mail iOS (2024) · 4.7 stars across 4.9M App Store ratings · Catch Up: ~19% of iOS weekly actives, revenue per user up 1.6–2.1%

SUMMARY

- **Profile:** Principal Product Manager for mobile productivity at Yahoo Mail. Led the redesign of the inbox people use every day and the team that built Mail's mobile Calendar from scratch, on iOS and Android.
- **Yahoo:** Since 2012, from front-end and iOS engineering to Principal PM; co-inventor of four US patents (AI email summaries, AR interfaces).
- **Independent:** Ships App Store apps and playable 3D worlds, with 4.5M+ observed views and features from OpenAI, ChatGPT and Three.js.

EXPERIENCE

Yahoo | Product Management and Engineering

June 2012–present · Mountain View, CA

Principal Product Manager, Yahoo Mail · 2022–present

Earlier at Yahoo: iOS Engineer, Yahoo Mail, 2016–2021, leading product and engineering for AR ads from 2017 · Front-end Engineer, Yahoo Search (JavaScript, Node.js, React), 2012–2016.

- **Mobile product leadership:** Led product for Yahoo Mail's Inbox & Organize team on iOS and Android as the iOS app reached 20M daily active users in 2024 (4.7 stars across 4.9M App Store ratings). Owned the main message list, the cards at the top of the inbox and the controls for swiping, pinning and clearing mail, and led the redesign of message rows so people could scan previews and act from the list.
- **Catch Up:** Led the swipe-based inbox review with AI previews from concept to general availability with engineering, research and design partners; Yahoo announced the cross-platform launch in June 2025. It reached approximately 19% of iOS and 16% of Android weekly active users in 2025, with 42% and 32% week-over-week retention and revenue per user up 1.6% and 2.1%.
- **Mobile Calendar and LLM event extraction:** Led the team that built Mail's first native mobile Calendar on iOS and Android, including Gmail Calendar integration; about 10% of Mail's weekly active users used it in 2025. Set the quality bar and confirmation experience with ML partners for LLM-based event extraction, whose 2024 launch improved time-of-interest visibility by 23.9% with 76% user satisfaction.
- **Revisit, Planner and Priority Inbox:** Led Revisit, which brought saved mail, reminders and calendar items into one view and reached 20% of weekly active users in experiments before evolving into Planner. Launched Priority Inbox with the Mail Intelligence team for a 7% pageview lift.
- **Delete by Sender and measurement:** Led the Android launch; reported results included 2% higher average revenue per user and 7% more delete events. Helped establish Triage7 as a more sensitive inbox-organization metric and used adoption, retention and revenue measures to steer iteration.
- **Mail 7 redesign and craft:** Led navigation across iOS and Android, introducing the pill bar, and simplified roughly 40 theme combinations to four. Productized Schedule Send on both platforms, launched a productivity nudge for a 7% lift in core actions, and organized Hacksessibility, fixing 31 of 37 accessibility bugs in one week.
- **0-to-1 teams:** Founded MobX and later led X Team, two small product teams at Yahoo Mail whose remit was to build and ship real products quickly, put them in users' hands and find product-market fit.
- **Digest and Spaces:** Led X Team's first versions in about 14 weeks. Digest summarized recent mail; Spaces on iOS groups related messages and next steps for travel, family and finances.
- **Mail Home:** Led the Home initiative to explore how Yahoo Mail could work as a conversational assistant. Translated user research into requirements and prototyped which actions people wanted to confirm or undo.
- **Engineering foundation:** Owned the Yahoo Search Assist front-end library used in production by multiple Yahoo properties, then led the rewrite of mobile search in Node.js and React with reusable,

high-performance interaction libraries. Moved to native iOS, building Swift prototypes and Yahoo Mail features including AR, notification settings, onboarding and privacy.

- **AI knowledge and feedback systems:** Solo-built CUSS, a customer insight agent over 370,000+ feedback records from five sources, tested against a 29-case golden evaluation set; OCEAN, a Mail insight agent across 27 squads and 30 knowledge repositories with a 15-workflow evaluation framework, which handled 291 question submissions from July through September 2026; and Echo, an in-house feedback and roadmap app built in four days to replace a six-figure vendor contract.
- **Portfolio operations and security:** Established weekly reviews of the four internal AI products to track adoption, reliability, release readiness and decisions requiring leadership input. Restored endpoint protection across three Signal production servers, repaired Nessus vulnerability scanning on affected cloud hosts and patched OCEAN's production runtime while keeping the service available.
- **Team enablement:** Standardized squad planning updates with Program Management, turned eight training videos into a searchable onboarding hub, created a beta-testing template adopted by other product managers and built a retrospective tool that organized 174 team notes across 13 topics.
- **Customer research and experimentation:** Used funnel analysis to find where users dropped off when trying a new inbox feature and directed experiments that raised adoption from 3% to 16% of weekly active users, exceeding a 10% target. Translated a 30-participant study and eight follow-up interviews into launch requirements for Yahoo Mail Premium Home, defining first-release scope and ownership across Product, Design and Engineering.
- **GenAI enablement and internal platforms (2023–2026):** Seeded Yahoo's early generative-AI and Claude Code communities through live demos and knowledge-sharing channels. Built DROP, an internal app-publishing platform and SDK supporting identity, real-time state, files and multi-model Claude/Codex APIs with cost metering and permissions. Colleagues across Mail, Sports and Finance had created 300+ micro-apps by November 2026.
- **AR creative authoring tools (2017–2021, product and engineering):** Built Yahoo Mail's iOS AR ad experiences and the authoring tools, SPAARC / AR Ad Composer and AR Ad Generator, that let creative teams assemble 3D scenes, textures and animations without writing JSON. The work supported $2M in AR ad sales across advertisers including Home Depot, Macy's, Pottery Barn, HP, Walmart and Vodafone.

Nokia Siemens Networks | R&D Engineer, Wireless Systems

July 2008–July 2010 · Bangalore, India

Built C/C++ and Python simulation, automation and performance-testing tools for WiMAX, W-CDMA and LTE networks.

INDEPENDENT PRODUCTS AND CREATIVE WORK

- **DexRelay (iOS App Store):** Designed, built and shipped an iPhone-to-Mac control plane for steering Claude Code and Codex projects, approvals and builds: SwiftUI app, installable CLI, QR pairing, LAN-first WebSockets with Tailscale fallback, and a self-healing launchd Mac runtime with health, repair and wake controls. Shipped before OpenAI launched its own Codex remote control.
- **AppTruffle and Polly (iOS App Store):** Shipped a market-research app backed by a Python and SQLite collection pipeline (12,084 apps and about 1.98M ranking snapshots in an August 2026 snapshot) with Cloudflare delivery, and a retro camera app built on AVFoundation, CloudKit backup and StoreKit subscriptions.
- **Foldline Tales (iOS App Store):** Designed, directed, built and shipped a playable 3D pop-up storybook game for iPhone with tactile page-turn physics and interactive narrative pacing.
- **ClipFetch:** Built a native iOS library with asynchronous Python extraction, progress tracking and local Whisper transcription.
- **3DITIONS, 3D worlds and games:** Built an editable-world storefront and real-time platform spanning roughly 80 worlds, directing shaders, lighting, camera pacing and mechanics, and sold editable kits to paying customers. Creative posts accumulated approximately 4.52M observed views and 48K likes across 83 tracked posts on X, Threads and Reddit as of November 15, 2026.

RECOGNITION

- **2026 Co-inventor, US Patent 12,783,570:** AI-generated email summaries shown in the inbox without opening the message.

- **2020–2022 Co-inventor, US Patents 10,679,414, 10,997,791 and 11,367,261:** “Presenting an augmented reality interface.”
- **2018 Lumiere Technology Award, Advanced Imaging Society:** Recognized for RYOT / Yahoo Mail AR.
- **2026 Featured by OpenAI and ChatGPT; shared by Three.js and OpenAI Developers** for independent 3D worlds.

SKILLS

Mobile and consumer: iOS and Android product leadership, habit and retention design, accessibility, App Store delivery, StoreKit and CloudKit.

Product: Discovery, customer-research synthesis, interaction design, rapid prototyping, experimentation, adoption and revenue metrics, roadmaps, cross-functional delivery.

Engineering: Swift / SwiftUI, JavaScript / TypeScript, React, Node.js, Python, SQL / BigQuery, REST, WebSockets, GCP, Cloudflare Workers.

AI and agents: Claude Code, Codex, retrieval and source provenance, evaluations and feedback loops, multi-model routing, MCP connectors, prompt and agent-workflow design.

EDUCATION

University of Southern California, M.S., Computer Science, 2010–2012

PES Institute of Technology, Bangalore, B.E., Information Science, 2008
